

## **CLAIMS**

Please cancel claims 1-22. Please renumber remaining claims 23 and 24 as 1 and 2 as follows. A clean copy of the amended claims is included below. A marked up copy of the entire claim set is included in Appendix A.

1. (Original)            A wearable headset communication unit comprising a housing and a transducer for reproducing sound, an aperture in said housing having at least one keyway, an attaching pin having a shaft size to be received within said aperture, said shaft having a key sized to be received within said keyway, an attachment point on said pin for receiving a lanyard, so that said pin and lanyard may be quickly removed from said headset.
  
2. (Original)            A headset according to claim 2 wherein said shaft is sized to be just slightly larger than said aperture, to create limited frictional impediment to rotation of said shaft when inserted into said aperture, thereby preventing said shaft from falling out even if the key and keyway are accidentally aligned for removal.
